General Fund Risks

Capital risk – the value of your investment will vary and is not guaranteed. It will be affected by changes in the exchange rate between the base currency of the fund and the currency in which you subscribed, if different.

Equity risk – in general, equities involve higher risks than bonds or money market instruments.

Geographic concentration risk – to the extent that a fund invests a large portion of its assets in a particular geographic area, its performance will be more strongly affected by events within that area.

Hedging risk – a fund's attempts to reduce or eliminate certain risks through hedging may not work as intended.

Investment fund risk – investing in funds involves certain risks an investor would not face if investing in markets directly.

Management risk – the investment manager or its designees may at times find their obligations to a fund to be in conflict with their obligations to other investment portfolios they manage (although in such cases, all portfolios will be dealt with equitably).

Operational risk – operational failures could lead to disruptions of fund operations or financial losses.

IMPORTANT INFORMATION

For Investment Professionals only. Not for further distribution.

The SICAV Funds are sub-funds of the T.
